

Complete Home Security Systems

Securitel home alarm systems will provide you with total peace of mind. Our Home Security Packages have everything you need to keep your family & your property safe, with add-ons that provide extra protection you can take control in the way that suits you best.

All our residential & business security systems are customized to fit your home and your needs. monitored 24/7, you can rest easy in the knowledge that we've got your back!

Cellular Communication

Our cellular communication is a perfect security solution for homes that have dropped their landline service. This also prevents an intruder from cutting your phone line to disable your security system.

Monitored Fire & Carbon Monoxide

The monitoring center will take immediate action and summon first responders when a smoke or carbon monoxide alarm sends an alert—they are an essential part of any home security system.

Video Surveillance

An advanced Security Camera System will help you stay connected to events going on inside and outside your home or business. Video surveillance features let you use your laptop or smartphone to stay in the know and stay in control using state-of-the-art apps for your smart devices
